

Tennis Safety Steps

- (1) All of our tennis balls are disinfected on a regular basis. We have an approved cleaner that removes any contaminants without damaging the integrity of the tennis ball.

- (2) We disinfect all carts, hoppers, and court equipment between each class. These are disinfected with approved cleaners.

- (3) We require all of our coaches to use the handwashing station in the tennis house between all classes. We also require all of our coaches to convey any possible symptoms of COVID-19 prior to allowing them on the tennis court.

- (4) We try to encourage all players to wash their hands with soap and water prior to and at the conclusion of playing. Both bathrooms by the tennis house have soap and hot water. We also have hand sanitizer available right inside the tennis house.

- (5) We have removed any common source drinking options from the tennis facilities. Usually there would be a cold water jugs and other hydration sources on the courts. We require everyone to provide their own water or alternate beverage.

- (6) We regularly replace the grips on any of the loaner racquets that we provide to players.

- (7) We encourage anyone not playing to wear proper PPE. This more so applies to our junior classes where parents have a tendency to stick around.

- (8) We encourage all players to arrive at the proper time and have staggered many of our classes to avoid large crowds coming and going at a single point.
